Full-stack developer with 8+ years of professional experience in e-commerce, web technologies, and Electronic Funds Transfer (EFT). High-performance technologist with knowledge of QA test methodologies and practices, DevOps (Front/Backend), and skilled at defining, designing, and implementing secure coding practices within a SCRUM team.

SKILLS

C, C#, Java, Delphi, PHP, JavaScript, HTML5, CSS3, JQuery, MySQL, Sequelize, MongoDB, PostgreSQL, JSON, Restful APIs, Node.js, Express.js, ReactJs, MaterialUI, Bootstrap
Git and GitHub, TortoiseSVN, Heroku
Eclipse IDE, Visual Studio 2013, Android Studio, Adobe PhoneGap, MS Project2010, dotProject.net, SoapUI

EXPERIENCE

FULL STACK DEVELOPER (Internship), MyShoperon | Dec 2020

- Participating in the design and creation of a new web application.
- Building the front-end of the application using ReactJs framework.
- Developing a MERN web application.
- Participating in the entire application lifecycle, focusing on coding and debugging.
- Working with development teams and product managers on a startup environment.

FULL STACK DEVELOPER, Software Express Informatica LTDA | Mar 2008 - Feb 2017

- Developed secure payment applications (PA-DSS) and maintained a secure environment of card information (PCI-DSS).
- Maintained and updated files and records to support efficient transaction operations.
- Created, debugged, and implemented software applications meeting all customer requirements.
- Built the UI and the back-end code of the SiTef webpage and performed analysis on responsiveness.
- Supported relational database operations by writing SQL queries with a focus on edit and update records with current information for effectiveness.
- Helped resolve problems such as pending transactions and misplaced information by carefully collecting information and developing knowledgeable solutions.
- Knowledge of TCPIP and X25 configuration, ISO 8583, and SOAP protocol.

- Taught junior employees how to perform tasks such as creating/modify configurators and sit modules, and how to make use of tests case.
- Validated project requirements to achieve a quality end-user experience.
- Created, executed, and evaluated manual/automated tests case.
- Maintained and provided accurate testing status reports during testing phases.
- Met targets consistently by working hard and with strong attention to detail.
- Developed and communicated standard operating procedures to a team of 15.
- Coordinated with business and technical teams to discuss issues and potential risks.
- Reviewed activities regularly to identify opportunities for improvement.

PROJECTS

OPEN SOUND (2020)

https://github.com/rodrigomgimenes/project_2 | <https://stark-woodland-75959.herokuapp.com>

A Spotify application that allows users to add/listen to music tracks and artists' information to a personal playlist.

- Core Responsibility: Project Management, Front/Back-End implementation of sign in/up, user playlist, search bar, SQL database, and Heroku deployment.
- Technologies used: HTML, CSS, Bootstrap, Font Awesome, Javascript, jQuery, Express, Node.js, Git/Terminal, Spotify API, MySQL, JawsDB, and Heroku.

EAT-DA-BURGER! (2020)

<https://github.com/rodrigomgimenes/uofteataburger.github.io> | <https://intense-oasis-22538.herokuapp.com/>

A restaurant application that allows users to add burgers to the menu using a form, and subsequently to "devour" them using a button which adds them to the "Devoured Burgers" list.

- Core Responsibility: Front/Back-End implementation, SQL database, and Heroku deployment.
- Technologies used: HTML, CSS, Bootstrap, Font Awesome, Javascript, jQuery, Handlebars, Express, Node.js, Git/Terminal, MySQL, JawsDB, and Heroku.

YOUTUBE APP (2020)

<https://github.com/rodrigomgimenes/react.youtube> | <https://rodrigomg-react-youtube.netlify.app/>

A Youtube application that allows users to search videos.

- Core Responsibility: Front/Back-End implementation.
- Technologies used: HTML, CSS, Semantic UI, ReactJS, Javascript, Youtube API, and Netlify.
